

Checking for 1NF

Airport

<u>AirportCode</u>	AirportName	City	Country	EstablishedYear
--------------------	-------------	------	---------	-----------------

The table **Airport** does not have composite or multivalued attributes and isn't consisted of nested relations.
Therefore the table is already in 1NF.

Airline

<u>AirlineCode</u>	AirlineName	Owner	FleetSize	Address	NoOfDestinations	HeadOfficeEmail	WebsiteURL	CommencementYear
--------------------	-------------	-------	-----------	---------	------------------	-----------------	------------	------------------

The table **Airline** does not have composite or multivalued attributes and isn't consisted of nested relations.
Therefore the table is already in 1NF.

Aircraft

<u>AircraftCode</u>	Name	Model	Manufacturer	MaxNoOfSeats	AirlineCode	FlightNo
---------------------	------	-------	--------------	--------------	-------------	----------

The table **Aircraft** does not have composite or multivalued attributes and isn't consisted of nested relations.
Therefore the table is already in 1NF.

Aircrew

<u>StaffID</u>	PassportNo	FirstName	LastName	Gender	Address	Designation	DateJoined	AirlineTrainingDetails	AcademicEducationDetails	AirlineCode	LegNo	CheckInTime
----------------	------------	-----------	----------	--------	---------	-------------	------------	------------------------	--------------------------	-------------	-------	-------------

The table **Aircrew** does not have composite or multivalued attributes and isn't consisted of nested relations.
Therefore the table is already in 1NF.

Flight

<u>FlightNo</u>	FlightPath	AirlineCode	FlightType
-----------------	------------	-------------	------------

The table **Flight** does not have composite or multivalued attributes and isn't consisted of nested relations.
Therefore the table is already in 1NF.

Flight_Leg

<u>LegNo</u>	DateOfFlight	FlightStatus	AircraftCode	FlightNo
--------------	--------------	--------------	--------------	----------

The table **Flight_Leg** does not have composite or multivalued attributes and isn't consisted of nested relations.
Therefore the table is already in 1NF.

Passenger

<u>PassportNo</u>	FirstName	LastName	Gender	Nationality	DOB	PassportIssueDate	PassportExpiryDate
-------------------	-----------	----------	--------	-------------	-----	-------------------	--------------------

The table **Passenger** does not have composite or multivalued attributes and isn't consisted of nested relations.
Therefore the table is already in 1NF.

Reservation

<u>TicketNo</u>	Class	SeatNo	CheckInTime	BaggageWeight	PassportNo	LegNo
-----------------	-------	--------	-------------	---------------	------------	-------

The table **Reservation** does not have composite or multivalued attributes and isn't consisted of nested relations.
Therefore the table is already in 1NF.

Provide_Services

<u>AirlineCode</u>	<u>AirportCode</u>	AirlineName	Owner	FleetSize	Address	NoOfDestinations	HeadOfficeEmail	WebsiteURL	CommencementYear	AirportName	City	Country	EstablishedYear
--------------------	--------------------	-------------	-------	-----------	---------	------------------	-----------------	------------	------------------	-------------	------	---------	-----------------

The table **Provide_Services** does not have composite or multivalued attributes and isn't consisted of nested relations.
Therefore the table is already in 1NF.

Airline_Contact_No

<u>AirlineCode</u>	<u>ContactNo</u>
--------------------	------------------

The table **Airline_Contact_No** does not have composite or multivalued attributes and isn't consisted of nested relations.
Therefore the table is already in 1NF.

Aircrew_Contact_No

<u>StaffID</u>	<u>ContactNo</u>
----------------	------------------

The table **Aircrew_Contact_No** does not have composite or multivalued attributes and isn't consisted of nested relations.
Therefore the table is already in 1NF.

Passenger_Contact_No

<u>PassportNo</u>	<u>ContactNo</u>
-------------------	------------------

The table **Passenger_Contact_No** does not have composite or multivalued attributes and isn't consisted of nested relations.
Therefore the table is already in 1NF.

Landing

<u>FlightNo</u>	<u>AirportName</u>
-----------------	--------------------

Take_Off

<u>FlightNo</u>	<u>AirportName</u>
-----------------	--------------------

The tables **Landing** and **Take_Off** do not have composite or multivalued attributes and are not consisted of nested relations.
Therefore both tables are already in 1NF.
